SUMMARY

Full-stack developer and prompt/context engineer with hands-on experience building clean, responsive apps using MERN, next.js, node.js and integrating modern AI technologies. Skilled in leveraging LLM tools and AI platforms like Cursor, Claude Code for intelligent, context-aware and fast solutions.

EXPERIENCE

Full Stack Developer

Grow Mentality

December 2025 - June 2026, Remote

- Delivered 20+ full-stack enhancements and features across internal admin platforms using JavaScript, Node.js, Express, and modern frontend technologies, supporting workflows for order operations, messaging, analytics, and account health management.
- Built and improved 5+ operational modules and dashboards, including real-time notifications, workflow automation, advanced filtering, CSV export, and role-based access, helping streamline high-volume internal business processes.
- Enhanced usability across 10+ admin pages and interfaces through responsive design, reusable UI components, and dashboard improvements, creating a more efficient and scalable experience for internal teams.

PROJECT

Tasteboard

Personal • tasteboard.vercel.app

- Built tasteboard, a visual bookmarking app with 1-click capture, searchable notes, category filters, and a gallery view for organizing design inspiration.
- Designed a privacy-friendly local app with 100% browser-based storage, export/import backups, image previews, and keyboard-friendly browsing.
- Tech Stack: Next.js, React, TypeScript, Tailwind CSS, Dexie/IndexedDB, Framer Motion, JSZip, Vercel.

Verse Sensei

Personal • versensei.vercel.app

- Built an interactive anime character chat platform supporting real-time conversations across multiple universes with authentic character behavior, dynamic universe switching and much more.
- Implemented secure multi-auth (email, Google, magic links) using Supabase, protected routes with AuthGuard, and responsive animated UI using Framer Motion + Tailwind, featuring interactive maps, custom theming, and persistent sessions.
- Tech Stack: Next.js, TypeScript, Supabase (Auth/Database/Storage), Tailwind CSS, Framer Motion, Radix UI.

Loopin - A Discussion Forum

Personal • keeploopin.vercel.app

- Developed a full-stack discussion forum platform with real-time thread updates, anonymous posting capabilities, and secure user authentication system.
- Implemented features including image attachments, microblog export functionality, thread management, and dynamic comment threading with anonymous/verified user toggle.
- Tech Stack: Next.js, TypeScript, Supabase (Auth/Database/Storage), Tailwind CSS, Framer Motion, SWR.

EDUCATION

Bachelor of Technology, Information Technology

Kalinga Institute of Industrial Technology • Bhubaneswar, Odisha • January 2025

12th CBSE Board

Shiv Jyoti International • Kota, Rajasthan • January 2021

10th CBSE Board

Delhi Public School, Numaligarh • NRL Township, Golaghat, Assam • January 2019

SKILLS

Languages: Kotlin, Dart, C++, C, Java, SQL, JavaScript, TypeScript, Python, R, Bash, HTML, CSS

Frameworks/Libraries: Flutter, Android Jetpack, React.js, Express, Next.js, Node.js, Pandas, NumPy, Matplotlib, Langchain, Flask, Streamlit

Databases: MySQL, Firebase, Supabase, MongoDB, ChromaDB, Room, Hive, MongoDB

Cloud/DevOps: AWS (EC2, S3), GCP, Redis, Docker, Vercel
